

Sauna chairs and loungers - Usage and care

Usage Instructions

These sauna chairs are versatile and suitable for use in various indoor and semi-indoor spaces such as saunas, infrared saunas, dressing rooms, fireplace lounges, relaxation rooms, porches, balconies, and other similar environments.

Chairs are delivered fully assembled and ready for immediate use.

Storage and Placement

- The chairs are specially designed for the warm and humid conditions found in saunas. They perform best indoors and are therefore not ideal for prolonged outdoor storage in rain or direct weather exposure.
- Allow the chairs to dry thoroughly after each use in a well-ventilated area.
- When not in use, chairs can be conveniently stored folded in an upright position, requiring minimal space.

Protection

- These chairs are ideal for typical sauna benches, but extra care should be taken when moving them on particularly soft wooden surfaces to avoid scratches.
- Always ensure appropriate safe distances from heaters when positioning the chairs.

Care Instructions

Wooden Parts

- The chairs' wooden components are crafted from high-quality alder and treated with clear sauna wax.
- Do not use oils or paraffin oil on wooden parts.
- Clean wooden parts as needed with water and a soft brush or gentle spraying.
- Allow to dry in a warm sauna or another dry area.
- The metal components are made of durable stainless steel and require no special care.

By following these simple instructions, you will extend the lifespan of your sauna chairs and keep them looking beautiful for years to come.
